

Quotes Manager

Efficient – Transparent - Cost Effective – Client Specific – Online - Automated

Quotes Manager has been designed to allow for the electronic “Site and Field Procurement” of material and service packages via a client’s dedicated portal.

Functionality includes:

- the preparation of requisition's;
- request for quotations;
- Suppliers lists for each package;
- the lodgment and receipt of quotations;
- the review and assessment of quotations against the purchasers budget;
- of quotations against the purchasers delivery and completion dates;
- the revalidation of expired quotations;
- the recommendation of a supplier for award;
- purchase order generation based on a mutually agreed position with a preferred supplier;
- letters of regret generation;
- milestone tracking of packages;
- a purchaser/Suppliers negotiation tool;
- bill of material deactivation/reactivation;
- a purchase order cancellation and reinstatement function;

Ideal uses for this Procurement software are:

- The non tendered management of your site or field procurement requirements;
- Manages the lifecycle procurement of hundreds of packages for your site and field procurement requirements;
- Introduces supplier contestability, transparency and efficiencies through automation.
